

El Salon Rojo

How to provide the classroom with a gift from the Wish List:

1. Choose the item you would like to purchase from the list below.
2. Write a check for the total amount of the order.
3. Place check in an envelope made out to MCH/PA and send to office.
4. Your gift is tax-deductible; receipts can be issued for donated items.

- **Continent Book Set** **Item No. C60** **Price \$50.50**
“Where could you sail along the world’s longest river?” Africa. “Where could you watch penguins slide across thick ice?” Antarctica, of course. Each book in this set draws in early readers with an intriguing “fact” question, then satisfies their curiosity with photos and more details about the land, animals, and people. Includes world and continent political maps, “cool facts,” glossary, and further resources. Set includes: *Antarctica, Australia, Africa, Asia, Europe, South America, and North America*. Paperback, 32 pages each. Ages 4 and up. www.montessoriservices.com
- **Cosmic Wonder (Concepts) Set** **Item No. R41** **Price \$25.00**
Help awaken children’s sense of wonder and awe with these engaging books. The small format (just 5½" square) appeals to children, and the early reading level gives children easy access to big concepts. These titles highlight cosmic education themes, and emphasize concepts that reinforce children’s developing understanding of a cosmic view of life. Each book introduces a child to some aspect of our universe. Through the use of the first person narrative the reader becomes the main character of the book, thus seeing the universe from his/his own perspective. Written by Montessorian Aline Wolf. Illustrated by Joe Servello. Spiral-bound paperback, 20 pages each. www.montessoriservices.com
Seven Prepositions: Function of Word
- **Cards & Replicards** **Item No. L115** **Price \$14.95**
Learning that words have different functions is a key to understanding language. These cards help children learn seven words that describe the relationships between objects. Labeled picture cards show the location of a ball in relation to a basket: *in, on, above, behind, in front, beside, under*. Introduce the concept with a real basket and ball that match the photograph. For a three-part card reading activity, cut apart the duplicate set of cards. Children can use photocopied replicards (4¼" x 5½", after cutting) to make booklets. Includes 14 picture cards (2¾" x 4¼") and replicard. From *In-Print for Children*. www.montessoriservices.com
- **About... Vertebrates Set** **Item No. SC835** **Price > \$39.75**
Offer children these rich zoology resources, with natural-history quality information and illustrations. One book for each type of vertebrates class: fish, amphibians, reptiles, birds, and mammals. A great complement to classification work, each book in the set covers the unique characteristics of one vertebrate class: food, habitat, locomotion, self-defense, life cycle, and importance. Simple sentences face illustrations: “*Most amphibians eat insects.*” The afterword explains more about the image using more complex language: “*Frogs and toads capture insects by flicking their tongues out...*” Paperback, 38-44 pages. Ages 3 - 8. www.montessoriservices.com
- **North America Biome Puzzle-New** **Item No. 100NA** **Price \$75.00**
Traditionally, in Montessori classrooms, we have had the political maps in the 3 to 6 classroom but the idea of a political boundary is very abstract for the young child. By contrast, the idea of a mountain of

rock, a field of grass, a forest of trees or a plain of ice and snow can be very real and concrete. Consider biome maps for your primary classroom as an integral part of your biome studies that bring geography science and language together to spark the child's imagination. Biome puzzle maps encourage children to see the earth as a biosphere. Pieces are color coded to represent the biomes of a continent. Laser cut in wood, so lost pieces are always replaceable. They include a double sided wood veneer control chart. The puzzles shown here are our new version, now printed on wood allowing the beautiful grain to show through.

- **North America Biome Readers** **Item No. 2NAR** **Price \$45.00**
North America Biome Readers. When a class is studying a continent and the people and animals that live there, these phonetic readers will allow every child, even those reading three letter words with short vowels, an opportunity to read about what they are studying.
With a preparation of learning some basic sight words, the child reads the small booklet without pictures so that they can focus on decoding. Next, the child reads the same text again in the process of matching it to illustrations. Numbers on the back of the cards allow for self-checking. Newly revised masters for the booklets are included so that the final step involves the child reading the text for a third time, showing more confidence and demonstrating her comprehension by illustrating her own copy to take home. <http://wasecabiomes.org/>

- **South America Biome Puzzle-New** **Item No. 400SA** **Price \$75.00**
